

A קורה may be placed on two pegs that protrude upward from the wall provided that they are within three טפחים of the wall because of לבוד (לבוד is a למה מסיני which considers space less than three טפחים to not be considered space).

It is מותר to carry under or opposite the לחי or קורה provided the מבו opens into a רשות הרבים, but if it opens into a כרמלית, the space under or opposite the לחי or קורה are considered like a כרמלית and it is forbidden to carry there (although obviously a רשות הרבים is more חמיר than a כרמלית, since these areas are more similar to a רשות היחיד than they are to a כרמלית, it is אסור to carry there).

If a לחי can only be seen from the street, or can only be seen from within the מבו it is כשר (provided that it is a כשר לחי, i.e., ten טפחים tall and within three טפחים of the wall and three טפחים of the ground).
