

דף יומי הלכה שבת פג

Items that service עבודה זרה are מטמא through being carried.

If a זב was on one side of a scale, and foods or utensils are on the other side, they become טמא. This law is unique to the זב, that even if the other objects lift him up, they still become טמא, unlike other types of טומאה which would require the side of the scale that contains the טומאה to be the lifter, not the liftee (היסטו).

An עבודה זרה that is taken apart, even if able to be easily reassembled is not טמא. עבודה זרה smaller than a כזית is not מטמא. דרבנן is טומאת עבודה זרה.

A ship is not טומאה מקבל even if it is made of חרס.

תורה is not retained unless one gives his life for it.
